

The Case of the Golden Fish

Grade 6 math · Percentages, Exponents, Order of operations, Multiplication, Division · Reading level grades 1-2

Detective: _____ Date: _____

The Golden Fish trophy is gone! It was stolen from the Kitty Town Museum last night. The Museum Curator found paw prints near the empty glass case. We must help find the cat who took it!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the stray cat burglar is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Percentages

We check the museum guard tablet. The battery screen shows how much power is left. We use a percentage to find the clue.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 2 Exponents

Next we look at a secret cat device. Its power level grows very fast like a math exponent. We calculate the power to unlock a note.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

A group of stray kittens helped the thief. We divide up the stolen treats to see how many fish each kitten got.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$108 \div 12 = \boxed{}$

$33 \div 11 = \boxed{}$

$12 \div 1 = \boxed{}$

$7 \div 1 = \boxed{}$

$8 \div 2 = \boxed{}$

$80 \div 10 = \boxed{}$

$40 \div 4 = \boxed{}$

$18 \div 9 = \boxed{}$

$48 \div 8 = \boxed{}$

$4 \div 4 = \boxed{}$

$22 \div 2 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain scales the brick wall climb style, then shines a laser pointer to distract the guard.
2. The villain uses a super jump to reach the roof, then waves a feather wand to bypass the lasers.
3. The villain peers through the dark with night vision, then tangles the path with a yarn launcher.
4. The villain peers through the dark with night vision, then squeaks a squeak toy to lure the mice away.
5. The villain uses a super jump to reach the roof, then tangles the path with a yarn launcher.
6. The villain uses a super jump to reach the roof, then shines a laser pointer to distract the guard.
7. The villain shatters the glass with a mega meow, then shines a laser pointer to distract the guard.
8. The villain sneaks inside with a silent walk, then makes everyone sleepy with catnip spray.
9. The villain sneaks inside with a silent walk, then tangles the path with a yarn launcher.
10. The villain shatters the glass with a mega meow, then waves a feather wand to bypass the lasers.
11. The villain uses a super jump to reach the roof, then makes everyone sleepy with catnip spray.
12. The villain scales the brick wall climb style, then makes everyone sleepy with catnip spray.
