

The Case of the Missing Golden Pig Trophy

Grade 5 math · Addition, Rounding, Fractions of a number, Order of operations, Division · Reading level grades 5-6

Detective: _____ Date: _____

The Swine Basketball Association championship is tonight, but the coveted Golden Pig Trophy has been stolen from the trophy case! A mysterious sneaker snatcher left muddy hoof prints all over the court. Head Coach Snout needs your math skills to crack the case and find the thief before tip-off!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the sneaker snatcher is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Addition

Coach Snout needs to count the championship basketballs. He tallies up the basketballs in the rack and adds the ones in the locker room to find the total.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 2 Rounding

The arena scale is a bit muddy. When we weigh the heavy pig feed, the digital display can only show the weight rounded to the nearest ten pounds.

Solve each problem, then write its letter in every clue box that shows the same number.

Fractions of a number

The team ordered a giant box of training apples. To find out how many are ripe, we need to calculate exactly three-fifths of the pile.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

The porky players need to share the clean team towels. We must divide the total pile of towels equally among all five starting players.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$45 \div 9 = \boxed{}$

$48 \div 12 = \boxed{}$

$88 \div 11 = \boxed{}$

$18 \div 2 = \boxed{}$

$77 \div 7 = \boxed{}$

$144 \div 12 = \boxed{}$

$16 \div 8 = \boxed{}$

$48 \div 8 = \boxed{}$

$70 \div 7 = \boxed{}$

$27 \div 9 = \boxed{}$

$6 \div 6 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain dribbles a squealing fast break, then adjusts a neon headband.
2. The villain throws a no look pork pass, then zips away in springy squeak shoes.
3. The villain throws a no look pork pass, then shines a golden snout guard.
4. The villain dribbles a squealing fast break, then tightens some sticky grip gloves.
5. The villain throws a no look pork pass, then flutters a sparkly pig cape.
6. The villain sinks a trotter three pointer, then zips away in springy squeak shoes.
7. The villain sinks a trotter three pointer, then tightens some sticky grip gloves.
8. The villain performs a swine slam dunk, then flutters a sparkly pig cape.
9. The villain dribbles a squealing fast break, then zips away in springy squeak shoes.
10. The villain executes a muddy crossover, then shines a golden snout guard.
11. The villain executes a muddy crossover, then flutters a sparkly pig cape.
12. The villain sinks a trotter three pointer, then shines a golden snout guard.
