

The Case of the Missing Masterpiece Pencils

Grade 8 math · Exponents, Square roots, Pythagorean theorem, Order of operations, Two-step equations · Reading level grades 7-9

Detective: _____ **Date:** _____

During the National Sketching Finals, the legendary Masterpiece Pencil Set was stolen from the display case. The Lead Curator needs your math skills to examine the clues left behind in the studio and catch the culprit from the twenty-four finalists.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Pencil Thief is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Exponents

The security lock on the sketch vault requires calculating the exponential growth of the automated lead-dispensing bins over time.

Square roots

To map the crime scene grid, you must find the square root of the total area of the studio floor to find its side lengths.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Two-step equations - the last clue**

The final lockbox contains a scrap of evidence, which you can retrieve by solving a two-step equation representing the shared art supplies.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$5x + 10 = 15, x = \boxed{}$

$4x + 3 = 23, x = \boxed{}$

$2x + 11 = 33, x = \boxed{}$

$3x + 1 = 19, x = \boxed{}$

$4x + 7 = 47, x = \boxed{}$

$5x + 5 = 15, x = \boxed{}$

$5x + 1 = 41, x = \boxed{}$

$5x + 7 = 67, x = \boxed{}$

$2x + 11 = 25, x = \boxed{}$

$6x + 1 = 19, x = \boxed{}$

$5x + 4 = 49, x = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain traces the contour lines, then bends a flexible curve.
2. The villain shades the background softly, then activates a battery eraser.
3. The villain sketches a rapid gesture drawing, then empties a dual sharpener.
4. The villain shades the background softly, then empties a dual sharpener.
5. The villain cross hatches the canvas, then buffs with a chamois cloth.
6. The villain cross hatches the canvas, then activates a battery eraser.
7. The villain traces the contour lines, then buffs with a chamois cloth.
8. The villain traces the contour lines, then empties a dual sharpener.
9. The villain traces the contour lines, then activates a battery eraser.
10. The villain stipples the design, then activates a battery eraser.
11. The villain cross hatches the canvas, then bends a flexible curve.
12. The villain shades the background softly, then bends a flexible curve.
