

The DeathRun Trap Sabotage

Grade 5 math · Fractions of a number, Order of operations, Multiplication, Rounding, Division · Reading level grades 5-6

Detective: _____ Date: _____

A rogue player has hijacked the DeathRun server controls! They triggered a hidden lava trap at the end of the Castle Ruins map, dropping the Chief Runner into the pit. We need to analyze the server logs and trap data to find the Rogue Killer before the next round begins!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Rogue Killer is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

Order of operations

To unlock the security feed showing which hand clicked the button, we must solve a multi-step trap code equation.

Solve each problem, then write its letter in every clue box that shows the same number.

Multiplication facts (1-12)

The villain ran across a grid of trick tiles. If we multiply the rows of tiles, we can find the exact strength of their weakness.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

We found a stash of dropped lobby tickets. Sharing them equally among the team reveals the clue pointing to their avatar hat.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$12 \div 2 = \boxed{}$

$14 \div 2 = \boxed{}$

$90 \div 10 = \boxed{}$

$4 \div 4 = \boxed{}$

$21 \div 7 = \boxed{}$

$12 \div 6 = \boxed{}$

$110 \div 11 = \boxed{}$

$20 \div 5 = \boxed{}$

$22 \div 2 = \boxed{}$

$96 \div 12 = \boxed{}$

$24 \div 2 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain releases the spike wall, then rewinds time with a time warp.
2. The villain activates the lava pit trap, then escapes using double jump.
3. The villain collapses the tricky bridge, then floats away with a gravity coil.
4. The villain activates the lava pit trap, then floats away with a gravity coil.
5. The villain releases the spike wall, then flees with a speed coil.
6. The villain releases the spike wall, then blocks attacks with a shield charm.
7. The villain shoots a poison dart, then flees with a speed coil.
8. The villain drops a falling boulder, then escapes using double jump.
9. The villain collapses the tricky bridge, then flees with a speed coil.
10. The villain releases the spike wall, then floats away with a gravity coil.
11. The villain shoots a poison dart, then floats away with a gravity coil.
12. The villain activates the lava pit trap, then rewinds time with a time warp.
