

The Golden Cleat Mystery

Grade 3 math · Rounding, Addition, Subtraction, Multiplication, Division · Reading level grades 3-4

Detective: _____ Date: _____

The golden cleat is missing from the trophy room. The star player cannot play without it. Search the locker room for clues to stop the thief.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the rogue winger is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 5**Division facts (1-12) - the last clue**

Dividing the team into two groups reveals the hair color at the exit

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$50 \div 10 = \square$

$20 \div 2 = \square$

$42 \div 6 = \square$

$14 \div 7 = \square$

$48 \div 4 = \square$

$16 \div 4 = \square$

$12 \div 12 = \square$

$30 \div 5 = \square$

$27 \div 9 = \square$

$132 \div 12 = \square$

$56 \div 7 = \square$

Step 2 - cross out the sentence with each answer:

1. The villain slides on turf, then dashes to the bus.
2. The villain dives for cover, then hides the prize.
3. The villain dives for cover, then jumps the wall.
4. The villain steals the trophy, then dashes to the bus.
5. The villain kicks the ball, then locks the door.
6. The villain trips the guard, then jumps the wall.
7. The villain slides on turf, then locks the door.
