Grade 9 math · Fractions of a number, Word problems, Rounding, Two-step equations · Reading level grades 7-9

Detective: _____ Date: _____

The Carbon Citadel has been breached! The priceless Paragon Diamond, a massive flawless crystal of unmatched purity, has been stolen from its gravity-locked pedestal. As the agency's lead detective, you must solve the security overrides and track down the thief before they escape orbit.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Infiltrator is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 5**Fractions of a number - the last clue**

We analyze the fraction of depleted power cells left in the mainframe to double-check the suspect's exact escape vector.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$1/2 \text{ of } 22 = \boxed{}$

$5/6 \text{ of } 12 = \boxed{}$

$2/10 \text{ of } 5 = \boxed{}$

$5/10 \text{ of } 16 = \boxed{}$

$1/8 \text{ of } 16 = \boxed{}$

$1/2 \text{ of } 6 = \boxed{}$

$2/3 \text{ of } 9 = \boxed{}$

$1/3 \text{ of } 15 = \boxed{}$

$1/10 \text{ of } 90 = \boxed{}$

$3/10 \text{ of } 40 = \boxed{}$

$2/8 \text{ of } 16 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain floats over the pressure plates, then drills through the floor.
2. The villain phases through the vault wall, then escapes using hover boots.
3. The villain dashes past the laser grid, then creates a decoy to distract guards.
4. The villain floats over the pressure plates, then cuts the display case.
5. The villain melts the security glass, then releases a thick smoke cloud.
6. The villain melts the security glass, then creates a decoy to distract guards.
7. The villain phases through the vault wall, then drills through the floor.
8. The villain melts the security glass, then drills through the floor.
9. The villain crystallizes the lock mechanism, then drills through the floor.
10. The villain dashes past the laser grid, then drills through the floor.
11. The villain melts the security glass, then escapes using hover boots.
12. The villain dashes past the laser grid, then releases a thick smoke cloud.
