

The Mystery of the Blocky Fossil

Grade 2 math · Addition, Subtraction, Skip counting, Place value, Missing addends · Reading level grades 1-2

Detective: _____ Date: _____

A sneaky thief broke into the Dino-Cat Museum. They stole the famous Fossil Fish. The museum is made of pixel blocks and dinosaur nests. Can you help us find the thief and save the fossil?

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the the Pixel Cat-Thief is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Addition

We need to count the stray pixel blocks left on the grass. Add the blocks together to clear the path to the first clue.

Solve each problem, then write its letter in every clue box that shows the same number.

Subtraction

Some dinosaur eggs were moved from the nest. Subtract the missing eggs to find how many are safe. This will show us the second clue.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 3 Skip counting

The blocky cat ran along the stone path. Skip count by twos on the lit blocks to track the prints and find the third clue.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Missing addends - the last clue**

We have some fish in the box but we need more to fill it. Find the missing number of fish to get the final clue.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$8 + \underline{\quad} = 16$

$5 + \underline{\quad} = 10$

$5 + \underline{\quad} = 17$

$4 + \underline{\quad} = 5$

$4 + \underline{\quad} = 11$

$1 + \underline{\quad} = 4$

$2 + \underline{\quad} = 13$

$3 + \underline{\quad} = 9$

$7 + \underline{\quad} = 11$

$2 + \underline{\quad} = 11$

$4 + \underline{\quad} = 6$

Step 2 - cross out the sentence with each answer:

1. The villain rode a raptor through the museum, then left blue diamond boot prints.
2. The villain rode a raptor through the museum, then threw a splash potion.
3. The villain rode a raptor through the museum, then built a giant iron golem.
4. The villain called a big triceratops, then drank a fast speed potion.
5. The villain rode a raptor through the museum, then ate a raw salmon block.
6. The villain spawned ten ocelots, then left blue diamond boot prints.
7. The villain called a big triceratops, then threw a splash potion.
8. The villain built an obsidian wall, then ate a raw salmon block.
9. The villain dug down with a diamond pick, then drank a fast speed potion.
10. The villain dug down with a diamond pick, then ate a raw salmon block.
11. The villain dug down with a diamond pick, then threw a splash potion.
12. The villain spawned ten ocelots, then drank a fast speed potion.
