

The Mystery of the Golden Pineapple

Grade 4 math · Place value, Rounding, Addition, Subtraction, Division · Reading level grades 3-4

Detective: _____ Date: _____

The legendary Golden Pineapple has been snatched from the central altar of the Whispering Vines temple! Our expedition needs you to follow the trails of jungle gear, sneaky tools, and unique habits to unmask the rogue explorer who took it.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Raider is _____

Possible suspects

CLUE 5**Division facts (1-12) - the last clue**

Four hungry spider monkeys are waiting in the canopy. We need to divide our pile of sweet bananas evenly among them.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$81 \div 9 = \boxed{}$

$96 \div 8 = \boxed{}$

$1 \div 1 = \boxed{}$

$11 \div 1 = \boxed{}$

$10 \div 1 = \boxed{}$

$12 \div 3 = \boxed{}$

$32 \div 4 = \boxed{}$

$3 \div 1 = \boxed{}$

$66 \div 11 = \boxed{}$

$10 \div 5 = \boxed{}$

$14 \div 2 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain cracks the ancient stone lock, then shines a laser at the map.
2. The villain snips the sneaky trap wire, then zooms off on a mini dirtbike.
3. The villain cracks the ancient stone lock, then blasts a loud golden whistle.
4. The villain whispers to the guard jaguar, then zooms off on a mini dirtbike.
