

The Mystery of the Missing Moon Crystal

Grade 3 math · Addition, Subtraction, Multiplication, Rounding, Division · Reading level grades 1-2

Detective: _____ Date: _____

Someone broke into the observatory dome! The glowing Moon Crystal is gone. The Cosmic Bandit left space footprints all over. We need to look for clues and save the day!

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the Cosmic Bandit is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Addition

We need to count our space suits. Let us add the clean suits and the dirty suits to find the total.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 2 Subtraction

Oh no! Some moon rocks are missing from the lab bag. Subtract the rocks left from the start amount to see how many are gone.

Solve each problem, then write its letter in every clue box that shows the same number.

Multiplication facts (1-12)

Let us check the rocket fuel packs. They are in equal rows. Multiply the rows to find the total fuel.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

We found a box of space snacks. We must share them equally among our crew to stay strong.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$48 \div 4 = \boxed{}$

$50 \div 5 = \boxed{}$

$48 \div 6 = \boxed{}$

$12 \div 12 = \boxed{}$

$77 \div 11 = \boxed{}$

$18 \div 2 = \boxed{}$

$12 \div 6 = \boxed{}$

$121 \div 11 = \boxed{}$

$15 \div 5 = \boxed{}$

$24 \div 6 = \boxed{}$

$50 \div 10 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain floats through the airlock, then hops into a tiny escape pod.
2. The villain disables the camera system, then climbs out the docking bay window.
3. The villain disables the camera system, then zips away on a space scooter.
4. The villain hacks the main console, then hops into a tiny escape pod.
5. The villain deactivates the gravity lock, then climbs out the docking bay window.
6. The villain deactivates the gravity lock, then hides inside a hollow asteroid.
7. The villain hacks the main console, then blasts off in a silver rocket.
8. The villain deactivates the gravity lock, then hops into a tiny escape pod.
9. The villain sneaks past the security drone, then blasts off in a silver rocket.
10. The villain disables the camera system, then hops into a tiny escape pod.
11. The villain sneaks past the security drone, then hides inside a hollow asteroid.
12. The villain floats through the airlock, then zips away on a space scooter.
