

The Sun-Dial Temple Heist

Grade 5 math · Place value, Fractions of a number, Order of operations, Multiplication, Division · Reading level grades 5-6

Detective: _____ Date: _____

Someone has swapped the legendary Golden Toucan statue with a painted clay fake! The Chief Museum Curator needs the Junior Explorer Club to track down the rogue explorer who took it before they escape the island.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the rogue explorer is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1 Place value

You find an ancient stone combination lock on a temple chest. The digits must be shifted by examining their place values. Cracking the lock reveals a secret note about the thief.

Solve each problem, then write its letter in every clue box that shows the same number.

Fractions of a number

A local guide offers a hint in exchange for some snacks. You must calculate a specific fraction of your supply pack to share with him fairly.

Solve each problem, then write its letter in every clue box that shows the same number.

Order of operations

To cross a shaky rope bridge, you must step on the wooden planks in the exact order of operations. Getting across safely lets you read a warning carved on the other side.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

You find a bundle of ancient map pieces. Dividing them equally among your team members ensures everyone has a section to study, revealing the final detail.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$11 \div 11 = \boxed{}$

$20 \div 4 = \boxed{}$

$100 \div 10 = \boxed{}$

$2 \div 1 = \boxed{}$

$56 \div 7 = \boxed{}$

$48 \div 8 = \boxed{}$

$14 \div 2 = \boxed{}$

$24 \div 2 = \boxed{}$

$18 \div 6 = \boxed{}$

$54 \div 6 = \boxed{}$

$12 \div 3 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain unlocked the heavy bronze vault, then escaped through the secret tunnel.
2. The villain swiped the golden toucan statue, then zipped down the canopy line.
3. The villain slid down the giant stone banister, then disappeared into the thick jungle.
4. The villain unlocked the heavy bronze vault, then disappeared into the thick jungle.
5. The villain sneaked past the sleeping guard dog, then leaped into a fast motorboat.
6. The villain slid down the giant stone banister, then scrambled up the muddy riverbank.
7. The villain swiped the golden toucan statue, then disappeared into the thick jungle.
8. The villain swiped the golden toucan statue, then scrambled up the muddy riverbank.
9. The villain slid down the giant stone banister, then escaped through the secret tunnel.
10. The villain bypassed the ancient dart trap, then escaped through the secret tunnel.
11. The villain bypassed the ancient dart trap, then leaped into a fast motorboat.
12. The villain bypassed the ancient dart trap, then scrambled up the muddy riverbank.
