

The Temple of the Golden Jaguar

Grade 5 math · Fractions of a number, Order of operations, Multiplication, Rounding, Division · Reading level grades 5-6

Detective: _____ Date: _____

A sneaky rogue explorer has slipped past the camp guards and stolen the legendary Golden Jaguar mask! The chief archeologist needs your help. We have a list of suspects, but we must use camp clues and local riddles to track down the thief before they escape on the riverboat.

1. Solve each math problem. The answer is a number, and the letter beside it is what that number stands for.
2. In the clue boxes, write that letter in every box showing the same number, then read the secret clue.
3. Use each clue to cross suspects off the list. The one suspect left at the end is the culprit!

My answer: the rogue explorer is _____

Possible suspects

Cross off a row as each clue rules it out. The one left at the end is the culprit.

CLUE 1
Fractions of a number

We found a torn explorer logbook by the river. To find out which escape vehicle the thief avoided, we must calculate what fraction of the pages remain dry.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 2 Order of operations

A locked stone door blocks our path. We must solve the multi-step equation carved on the archway in the correct order to reveal the flashlight grip left on the handle.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 3

Multiplication facts (1-12)

The team found crates of supply ropes stacked in matching rows. Multiplying the rows reveals the exact number of rope bundles and a clue about what slowed the thief down.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 4 Rounding

A dusty tracking screen in the research tent shows a blurry map. By rounding the distance numbers to the nearest ten, we can pinpoint the exact colored residue left behind.

Solve each problem, then write its letter in every clue box that shows the same number.

CLUE 5**Division facts (1-12) - the last clue**

We must divide our water canteens equally among the search teams before heading into the deep jungle to discover which trap finally stopped the runner.

First solve each problem. Then find each answer in the numbered list below and cross that sentence out. One sentence will be left - that is exactly what the villain did!

Step 1 - solve these:

$42 \div 6 = \boxed{}$

$9 \div 9 = \boxed{}$

$12 \div 1 = \boxed{}$

$80 \div 10 = \boxed{}$

$8 \div 2 = \boxed{}$

$36 \div 12 = \boxed{}$

$27 \div 3 = \boxed{}$

$70 \div 7 = \boxed{}$

$16 \div 8 = \boxed{}$

$110 \div 10 = \boxed{}$

$30 \div 6 = \boxed{}$

Step 2 - cross out the sentence with each answer:

1. The villain steals the golden jaguar paws, then dashes through the thick ferns.
2. The villain swipes the golden jaguar mask, then paddles away into the mist.
3. The villain sneaks past the temple guard, then paddles away into the mist.
4. The villain steals the golden jaguar paws, then runs along the canopy walkway.
5. The villain grabs the ancient stone map, then paddles away into the mist.
6. The villain swipes the golden jaguar mask, then runs along the canopy walkway.
7. The villain takes the ruby eyes of the idol, then flees down the rushing river.
8. The villain swipes the golden jaguar mask, then dashes through the thick ferns.
9. The villain grabs the ancient stone map, then flees down the rushing river.
10. The villain takes the ruby eyes of the idol, then climbs up the stone pillars.
11. The villain steals the golden jaguar paws, then paddles away into the mist.
12. The villain swipes the golden jaguar mask, then flees down the rushing river.
